Target version:	AMS - BEAM Meeting F	**Spent time:**	0.00 hour
Bugzilla-Id:	1145		

Description

Need an agent in Ptolemy that can execute arbitrary GridServices. These are basically web services with some additional, required methods that facilitate a science environment, and workflow performance optimization. One thing that will need to be handled is GSI authentication. To close this bug:

1) Develop a proposed architecture for running GridServices in ptolemy
2) Implement (1) for ptolemy
