Metacat - Bug #3712

Allow for customization of backup directory location

12/17/2008 04:31 PM - Michael Daigle

Status:	Resolved	**Start date:**	12/17/2008
Priority:	Normal	**Due date:**	
Assignee:	Michael Daigle	**% Done:**	0%
Category:	metacat	**Estimated time:**	0.00 hour
Target version:	1.9	**Spent time:**	0.00 hour
Bugzilla-Id:	3712		

Description

Right now the backup location defaults to /var/metacat/.metacat on linux/mac and C:\metacat\.metacat on windows. This should be changeable at configuration time.

History

#1 - 12/29/2008 09:23 AM - Michael Daigle

added a screen to choose the backup file location. Added discovery code to look in a system dir and user dir for existing backups.
