Kepler - Bug #3899

web service actor does not work through proxy

03/17/2009 12:19 PM - Chris Weed

Bugzilla-Id:	3899		

Description

The run script does not set up the java proxy settings, so anything that needs to connect to the internet through http fails.

I had to edit kepler.sh to be the following:
java -Xmx512m -Xss5m -Dhttp.proxyHost=proxy -Dhttp.proxyPort=8080 -DKEPLER="$KEP" -DKEPLER_DOCS="$KEP" -Djava.endorsed.dirs=./lib/jar/base-jars/apache -Djava.library.path=./lib org.kepler.loader.Kepler $*

However, this needs a more elegant solution, such as an environment variable, to allow the user to set this.

I guess in windows you have to edit kepler-console.bat to do this also.
