Kepler - Bug #5759

MatrixViewer window does not reappear

12/05/2012 03:23 PM - Daniel Crawl

Status:	Resolved	**Start date:**	12/05/2012

Target version:	2.4.0	**Spent time:**	0.00 hour
Bugzilla-Id:	5759		

Description

The MatrixViewer actor pops up a window displaying a matrix. If the window is closed, it does not reappear after running the model again (unlike the Display or plotting actors).

To reproduce:

1. open $PTII/ptolemy/domains/pn/demo/QR/QR.xml
2. run
3. close .QR.MatrixViewer
4. run
