Kepler - Bug #4289

Develop strategy for using assertions in the GUI

08/07/2009 02:42 PM - David Welker

Description

We need a strategy for making use of assertions. It is important to limit the potential states that the GUI can be in so that system state is more robust and understandable.

Using more assertions, perhaps combined with a speed/safety strategy would be useful.
I'm marking this as an enhancement and suggest that it should be post-rel-2.0.
