Target version:	Unspecified	**Spent time:**	0.00 hour
Bugzilla-Id:	4889		

Description

Place-holding bug for work done on the search interface.
Initially there was a single screen for specifying Entity/Characteristic/Standard/Protocol.
Now you can have n-of these groups.
Next the AND/OR needs to actually work.

History

#1 - 03/17/2010 04:25 PM - ben leinfelder

Include Context relationship searching. This needs to be added to the SMS AnnotationManager

#2 - 03/17/2010 04:48 PM - ben leinfelder

Another recommendation: do away with AND/OR confusion and use the search results ranking to indicate how closely the query was matched: AND are ranked higher because more criteria are matched.

#3 - 03/31/2010 07:54 AM - ben leinfelder

Consensus was to abandon this UI in favor of the iTunes-esque UI
