Morpho - Bug #644

MetaView Navigation and Entity/Attribute Links: top versus side display

10/23/2002 12:41 PM - Matthew Brooke

Bugzilla-Id:	644		

Description

1) The package level metadata view should not contain any links to sub-Entity-level metadata (i.e. it should contain links to all the entities, but not to their attributes or Physical data).

2) when user clicks one of the entity links, bottom tab should switch to that entity, so the data is displayed in the dataview, **and** its entity metadata is displayed in the right-hand metaviewer. The top (package level) metaviewer should **not** change.

3) As a consequence of this scheme, the Entity metadata shown in the right-hand metaviewer should have links to the Physical metadata for this entity (which would also show up in the right metaview), and to all the attributes in this entity.

4) Also, the triples relationships need to be more explicit than the older "is related to", in order to allow us to determine which links to show and which to suppress in the package-level (top) metaviewer

5) Finally, these links that are shown in the package-level metaviewer should ultimately show up in a top-level menubar menu, so the user can navigate to them without using the links

History

#1 - 04/08/2004 02:59 PM - Saurabh Garg

1) has been fixed. 2-5 is no longer relevant.

#2 - 03/27/2013 02:14 PM - Redmine Admin
