| **Target version:** | 1.6.0 | **Spent time:** | 0.00 hour |

**Description**

This may result in creating a Map model or just adding it to the AppModel, or just pulling in a JSON file.

This is mostly so that different themes can have different cluster color, opacity, font color, etc.

### History

**#1 - 06/12/2014 05:24 PM - Lauren Walker**

*- Subject changed from Allow different cluster options for different themes to Allow different map options for different themes*

Create a Map model will different settings for the map and its tiles

**#2 - 09/11/2014 04:32 PM - Lauren Walker**

*- Status changed from New to Resolved*

*- translation missing: en.field_remaining_hours set to 0.0*

A Map model now exists to set various map options such as tile color and border, tile label color, the option to draw markers instead of tiles when the result for that geohash is 1, zoom level on load, map Lat,Long center on load, etc.
