<b>Description</b>			
the line endings in the data file need to be replaced before sas is run. if it is running on windows, use /r/n and if unix use /n.			

### History

#### #1 - 02/27/2003 09:12 AM - Chad Berkley

Added a method in DataMassager.java to figure out what the line endings are and change them if needed. The preferred line ending is set in the config.xml file under the element LineEnding. This is set in the build file by a token "lineending". SAS will now run on all of the datasets that I have as test data including the ones I pulled directly from the knb.

#### #2 - 02/27/2003 09:12 AM - Chad Berkley

Chris's data also now will load into sas.
