I feel that there are a number of fields we could add like this that would make metadata more easy to query. Another good example would be if the stratum method follows Bob Peet method (one individual can be in multiple strata) or Don F-L method (one individual is always entirely assigned to a stratum, and only one).
<b>#3 - 04/19/2003 09:18 AM - Robert Peet</b>
Good idea
<b>#4 - 11/21/2003 09:25 PM - Michael Lee</b>
done, added to obseration in vegbank 1.0.2
<b>#5 - 01/31/2005 02:54 PM - Michael Lee</b>
changed from components that are to be deleted to "misc" so that bugs don't get deleted with component. Sorry for all the email.
