Description

The following error in the eml-methods documentation was reported by Eda Melendez:

--- Excerpt from Eda Melendez ---

I was looking at your online EML database module methods documentation (<http://knb.ecoinformatics.org/software/eml/eml-2.0.0/eml-methods.html#description>) and noticed there is a slight error on it:

the coverage field contains the description for the studyExtent with an extra sentence:

"See eml-coverage for more information"

then the description field has the "Description" for the coverage field. So the description field lacks "Description" (sounds like a paradox isn't it?)

--- End excerpt ---

History

#1 - 08/19/2003 01:21 PM - David Blankman

I think that Eda Melendez misinterpreted the schema and mistakenly reported a bug. I am changing the resolution to "invalid". If anyone else sees this as a valid but let me know. At this point I don't see anything to fix.
