

Jalama - Bug #1021

dynamically link the native libs on mac

03/24/2003 05:53 PM - John Harris

Description

I just noticed that the command proxy code, on the mac, is statically linked with the jvm registry code, instead of being dynamically linked, as on linux and win32. I'm not sure why this is, and I tried to link it dynamically but I got a linker error.
