Bugzilla-Id:	1026		
Description			
XSL transformation modules have been created to translate an emlbeta6 package to an eml2 document have been created. These should be added to the Morpho 'Export' menu item.			

History

#1 - 04/02/2003 12:08 PM - Dan Higgins

XSLT transformations can be called up in a new 'Export' dialog. Process works on Windows, but there is currently a problem on the Macintosh.

#2 - 05/01/2003 10:19 AM - Dan Higgins

EML2 export now works; problem on Mac traced to XPath that mistakenly ended with '/'. This is an incorrect XPath, but worked anyway under Windows!
