| Description | | | |
| An attribute node can be 'copied' but not 'pasted' from the xml editor of one package to another. This functionality used to work OK. | | | |

History

#1 - 04/28/2003 01:39 PM - Dan Higgins

This problem is a result of the special display of attribute names along with the 'attribute' element name in the editor. The code compared node names to determine if it was OK to paste at the indicated location. Changed to not include the actual node name in the comparison.
