

VegBank - Bug #1074

consolidate all party tables onto one

05/22/2003 11:14 AM - Michael Lee

Target version:	1.2.0	Spent time:	0.00 hour
Bugzilla-Id:	1074		

Description

PlantParty and commParty should be deleted and the only party table that will exist will be Party. This will make it easier for a user (linked to party via a field in the user database) to be matched to plantConcepts, commConcepts and observation contributed, etc.

History

#1 - 07/24/2003 07:57 AM - Michael Lee

Additionally, I think we should leave the field names in the plant* and comm* tables alone. ie plantParty_id and commParty_ID and only change that they newly reference party.party_ID instead of plantParty.plantParty_ID. This will cause fewer things to break.
