Target version:	Unspecified	Spent time:	0.00 hour
Bugzilla-Id:	1084		

Description

Data package wizard currently outputs name/val pairs in wrong order, and this is the order that the EML DOM gets generated in. Need to re-look at how values are pulled and sent to addToDOM_Command. Mainly this is done within the finish() function inside the file chrome/content/dataset/data_package_wizard.js file
