

Jalama - Bug #1108

filechooser not working in linux

06/18/2003 01:32 PM - Matthew Brooke

Status:	Resolved	Start date:	06/18/2003
Priority:	Normal	Due date:	
Assignee:	John Harris	% Done:	0%
Category:	jalama-general	Estimated time:	0.00 hour
Target version:	Unspecified	Spent time:	0.00 hour
Bugzilla-Id:	1108		

Description

1) start the data package wizard (./runtestwin.sh, then click "new data package" button to launch wizard)

2) hit "next" and enter a title, then hit next repeatedly until you get to the page entitled: "Data File Information". The "next" wizard-button will be disabled until you click one of the 4 radio buttons on this page.

3) click the first radio button ("Import data...")

4) a "File Location" textbox appears below this, with a "browse" button to the right of it.

5) Pressing the browse button **should** launch mozilla's filechooser popup, but doesn't. If you're running jalama against the mozilla binary, you get this command line output:

- JAVASCRIPT_DEBUG: browseAction() called with resultTarget = textbox
- JAVASCRIPT_DEBUG: jalama_library.js > asking user to select a file

```
###!!! ASSERTION: attempted to open a new window with no WindowCreator:
```

```
'mWindowCreator', file nsWindowWatcher.cpp, line 563
```

```
###!!! Break: at file nsWindowWatcher.cpp, line 563
```

```
unable to open file picker
```

```
[Exception... "Component returned failure code: 0x80004005 (NS_ERROR_FAILURE)
```

```
[nsIDOMJSWindow.openDialog]" nsresult: "0x80004005 (NS_ERROR_FAILURE)"
```

```
location: "JS frame ::
```

```
file:///home/brooke/mozilla/dist/bin/components/nsFilePicker.js :: anonymous ::
```

```
line 190" data: no]
```

- JAVASCRIPT_DEBUG: browseAction() path =

if running against the gre, the only debugging info is:

- JAVASCRIPT_DEBUG: browseAction() called with resultTarget = textbox

History

#1 - 03/11/2005 11:16 AM - Matthew Brooke

no longer required - not using webclient

#2 - 03/27/2013 02:16 PM - Redmine Admin

Original Bugzilla ID was 1108
