Morpho - Bug #1111

Problem with EML2 export with Java 1.4.2

07/11/2003 10:23 AM - Dan Higgins

Description

Export to EML2 functions seems to work fine with Java 1.4.1_02, but when the newer Java 1.4.2 version is used, the EML2 export fails to create a complete EML2 document. Apparently, the URI resolver that looks for files when a transformation is being done looks in a different location that previously!

The class "MyURIResolver" should handle this, but apparently does not!

History

#1 - 07/14/2003 11:10 AM - Dan Higgins

file url was set to begin with "file://"; changing this to "file:///" fixed
problem with Java 1.4.2. (Not sure why the old code works with Java 1.4.1 ???)
