VegBank - Bug #1120

log out doesn't appear to work

07/22/2003 04:34 PM - Michael Lee

Description

I don't think the log-out works. I can "back" button back
through it and link to the main-menu or attempt to load data and it
remembers who I was.

Not sure what priority/milestone to put this on. Semi-big deal. But also
not. I guess people like being able to log out securely. and it leaves open
the slight risk that someone using a shared machine could load data for
someone else.
