Bugzilla-Id:	114		

Description

Need to modify the current HTML interface for marine to allow display of the "package" relationships and allow for downloading the overall dataset and the specific metadata and data elements.

History

#1 - 09/20/2000 12:49 PM - Chad Berkley

The packaging functionality is now working. Functionality for downloading a zip file containing all of the package files also works. The package dtd and schema are in the dtd module under CVS. The other code is in the xmltodb module with the rest of the metacat code as normal.
