

EML - Bug #1150

documentation for KeyTypeCode is wrong

09/23/2003 03:08 PM - Chad Berkley

Status:	Resolved	Start date:	09/23/2003
Priority:	Normal	Due date:

Target version:	EML2.0.1	Spent time:	0.00 hour
Bugzilla-Id:	1150		

Description

The documentation for KeywordType says that the allowed values in an element of type KeyTypCode are "discipline", "stratum", "temporal", "thematic" or "taxonomic" when in fact they are "place", "stratum", "temporal", "theme" and "taxonomic"

History

#1 - 10/28/2003 02:39 PM - Matt Jones

Fixed documentation, making the lists of types match, and provided full documentation for each of the KeyTypeCode values in the enumeration.

FIXED.
