EML - Bug #1151

misspelled element name

09/23/2003 03:11 PM - Chad Berkley

Status:	Resolved		**Start date:**	09/23/2003
Priority:	Normal		**Due date:**	
Assignee:	Matt Jones		**% Done:**	0%
Category:	eml - general bugs		**Estimated time:**	0.00 hour
Target version:	EML2.0.1		**Spent time:**	0.00 hour
Bugzilla-Id:	1151			

Description
in eml-resource.xsd, the simpleType KeyTypCode should be spelled "KeyTypeCode" (line 393)

History

#1 - 10/28/2003 02:40 PM - Matt Jones

Renamed this simple type name so that it is spelled correctly. As it does not
actually correspnd to an element name (its a SimpleType) this change will not
affect the EML instance documents at all (and so is backwards compatible).

FIXED.

#2 - 10/28/2003 02:41 PM - Matt Jones
