

SEEK - Bug #1165

define wsdl interface for registry

09/26/2003 03:02 PM - Matt Jones

Status:	Resolved	Start date:	09/26/2003

Target version:	ecogrid-1.0.0beta1	Spent time:	0.00 hour
Bugzilla-Id:	1165		
Description			
Need to create a WSDL document defining the interfaces for registry operations for EcoGrid. We specified them in Seattle as four methods:			
<pre>register <-- takes a GSH and ProxyCert as input delete <-- probably rename to "unregister" to avoid conflict query <-- probably same as current ecogrid query method notify <-- when a registration event occurs on one node, it is responsible for notifying all other registry nodes of the change -- this requires some accomodation for failed notification attempts</pre>			
Matt agreed to do this. The methods might also include the methods for maintaining a certificate authority. See bug 1163 .
