

SEEK - Bug #1166

create a schema for registry metadata

09/26/2003 03:09 PM - Matt Jones

Status:	In Progress	Start date:	09/26/2003
Priority:	Immediate	Due date:	
Assignee:	Jing Tao	% Done:	0%
Category:	ecogrid	Estimated time:	0.00 hour
Target version:	ecogrid-1.0.0	Spent time:	0.00 hour
Bugzilla-Id:	1166		
Description Need a schema that defines the metadata associated with an EcoGrid Registry. Minimally this is the GSH of the registry, but it also will likely include other information, such as contact info for the maintainers, and mechanisms to get lists of the services registered there (probably already part of the ogsa registry interface). Matt agreed to start this, and Raja will review it.

This schema will be used in the <record> elements that are returned from queries to specify the GSH and other service metadata. A possible structure that fits into the resultset.xsd schema might look like this:

```
<resultset>
...
<record system="ecogrid://VOR.4" identifier="service.22">
  <regiseredService>
    <gsh>ecogrid://foo.com/my/service/handle</gsh>
    <serviceData>
      <analysisType system-"ontoService">GARP</analysisType>
    </serviceData>
  </registeredService>
</record>
</resultset>
```

Note that it was Bing and not Raja that agreed to review this.
