

VegBank - Bug #1169

Upgrade VegBranch to new 1.0.2 Vegbank data model

10/02/2003 08:29 AM - Michael Lee

Status:	Resolved	Start date:	10/02/2003
Priority:	Normal	Due date:	
Assignee:	Michael Lee	% Done:	0%
Category:	vegbranch	Estimated time:	0.00 hour
Target version:	1.1.0	Spent time:	0.00 hour
Bugzilla-Id:	1169		
Description			
mirror Vegbank in changing of stems model (new fields to taxonInterpretation) and irregular taxa (taxonObs.plantName_ID -> plantName and recursive key to taxonInterpretation for multiple concepts as part of the same interpretation). This also involves changes to the loading process in VegBranch.

History

#1 - 10/15/2003 04:09 PM - Michael Lee

<http://tekka.nceas.ucsb.edu/~lee/vegbranch/2003-10-15/>

contains the laterst version of VegBranch:
exportForm_irregTaxaFix_VegBranch.zip

This needs to be QA/QC by Lee Anne and Michael. Errors in the database can be posted to this bug.

#2 - 11/11/2003 02:13 PM - Michael Lee

- Bug 765 has been marked as a duplicate of this bug. ***

#3 - 11/21/2003 09:13 PM - Michael Lee

model changes mean VegBranch changes. Need to perhaps have a list for VegBranch updates, as users "out there" with VegBranch may want to know when it has been updated, even if they don't want to be on the vegbranch@vegbank.org list, for help.

#4 - 01/13/2004 11:08 AM - Michael Lee

VegBranch release candidate 1.0.2 is out. See Michael Lee for URL if you want it. Lee Anne is doing some additional tests on it and Michael will finish up any more work to be done with it the last week of January and get it to Tim Howard.

#5 - 02/16/2004 03:49 PM - Michael Lee

VegBranch 1.0.2 is ready to go from a functionality point of view. Need to get attached data (plants, etc.) from a real version of vegbank so that rectification becomes a non-issue (plants, etc. will be recognized from matched accession codes). That is captured in bug 699.

#6 - 02/28/2004 10:52 PM - Michael Lee

VegBranch now capable of zipping XML files, if the machine VegBranch is on has WinZip. There is some configuring needed, to make sure VegBranch knows where WinZip32.exe is, but once that's one, it's one button click-zipping. XML upload also now supports zipping, so it's a nice combination.

Users can also zip the files themselves, if they like, of course.
