Target version:	UnMilestoned	Spent time:	0.00 hour
Bugzilla-Id:	1170		

Description

eliminate the border and move lots of text to help file, linked from cert page "for more info, click here"

also, change help on plot-query.jsp so that it doesn't look like part of the form. add search buttons as well? Wait for Mark's update.

History

#1 - 10/13/2003 06:16 PM - Michael Lee

Certification updated.

Plot-query.jsp was updated by anderson. Somehow, it stopped working when lee updated vegbank website on 10/13. So, reverted to version 1.6 for this, passing this but to Mark to see what I messed up. Then, when plot-query works again, bug can be passed back to me so that I can fix formatting of plot-query page.

#2 - 10/20/2003 05:07 PM - P. Anderson

Go for it Michael. It appears to be working now. How, I'm not sure. Gabe's guess is probably most accurate: an environment change that worked itself out.

#3 - 10/23/2003 11:06 AM - Michael Lee

New help screen has been linke to so that you see a new pop-up window that tells you how to use the form. WE are having some env. issues that are causing plot-query to go offline without a complete rebuild. Working on reestablishing this. Works fine on tekka.
