Target version:	EML2.0.1	Spent time:	0.00 hour
Bugzilla-Id:	1195		

Description

This bug lists all remaining housekeeping issues to be resolved before the EML 2.0.1 release can be distributed. Please list any additional release-related tasks here by numer so they can be resolved before release.

- 1) Revise the namespace for all xsd files so that it reflects the new version number.
- 2) Revise README file, adding change summary and any relevant documentation changes
- 3) Generate new png files for all changed modules
- 4) Determine if xslt stylesheets are to be included in the release, and if so be sure they are properly included in the build.xml script.
- 5) Tag the release in the repository.

History

#1 - 11/06/2003 12:26 PM - Matt Jones

Finished (1) (revise namespaces)

Finished (2) (revise README)

Still need to do (3), (4), and (5)

#2 - 11/06/2003 12:28 PM - Matt Jones

6) Also need to validate that the inline element now accepts the right kind of content, probably by writing a new test document that checks this condition (bug 1008)

#3 - 06/22/2004 10:14 AM - Saurabh Garg

3) is done. I will tag the release in the cvs, once (4) is decided.

#4 - 08/06/2004 04:12 PM - Matt Jones

Finished (3), (4), (5), and (6). Release is ready. Willplace on web site on Monday (just to be sure I've covered all my bases).
