Bugzilla-Id:	1204		

Description

new datapackage handler needs to be able to handle either 'in-line' data or special 'urn/uri' description saved in 'online url' tag. Initially, we will just use an 'id' like that in current use - e.g. "ecogrid://higgins.234.3"
This has the advantage that same urn is used for local and metacat packages.

History

#1 - 12/29/2003 11:26 AM - Dan Higgins

implemented: urn assumed is of form

"ecogrid:\system\localid\other" where localid is of form 'higgins.234.3'

#2 - 03/27/2013 02:16 PM - Redmine Admin

Original Bugzilla ID was 1204
