

Morpho - Bug #121

nested boolean queries

09/20/2000 11:20 AM - Matt Jones

Description

This is a request for a feature enhancement so that users can construct arbitrary nested boolean queries in both the "all text" and the "Guided search" searches. This would allow both paranthetical grouping of the query terms, and using both AND and OR operators at any level in the nested query. This is an advanced feature that should probably be implemented after other search features such as the taxonomic search.

Blocks Morpho - Bug #216: combine subject and "all text" query screens

Resolved

04/09/2001

History

#1 - 04/09/2001 06:21 PM - Matt Jones

This is now part of the design of the new combined "subject" and "all text" searches. The details and spirit of this bug should be implemented in bug 216 and they would resolve at the same time.

#2 - 07/06/2001 10:01 AM - Matt Jones

Fixed when bug [#216](#) was fixed. See comments there for details.
