#### Description

Following changes need to be made in the Data Package Wizard:

- > ~~Add steps on the bottom of the screens. e.g. 'Step 3 of 13'~~
- > Change content and font size of the description of entry fields in accordance with what is suggested by Eric, Christy and Sandy.
- > ~~On the second screen while asking if this is part of a larger research project, use checkboxes instead of buttons.~~
- > Use the format "<b> Enter the xxxxx </b>: Description." for describing the data to be entered in a consistent manner.
- > ~~Should the labels be written next to the text boxes?~~
- > In the keyword entry field - we can remove the keyword type and we want to keep the keyword thesaurus.
- > ~~In the screen for describing the 'People and Organizations' to be added, replace responsible by certified and principal investigator by position name.~~
- > There should be spaces between buttons.
- > ~~There should be a record of people already entered and a way to select someone from the record. This is so that the user doesn't have to enter information again.~~
- > To find a way for saying one of the following is required: Last Name, Organization and position Name.
- > ~~There should be a list of suggested role (like a drop down menu) while entering roles in the Associated People and Organization.~~
- > Check the wording entered on the screen for specifying the Usage Rights.
- > ~~While entering Geographic Information - have a map which displays the areas that have been entered already. In the popup screen for entering geographic details, have a list of sites which specifies the field stations under the GBFS, NRS and others. Besides that have, four bounding boxes for entering the north, south, east and west coordinates.~~
- > Have the access control screen. First cut being just specifying public and private for all. Second cut having more functionality.
- > ~~Check all the relevant keyboard keys are captured.~~
- > Check for any of comments not covered above described in /docs/dev/datawizard-feedback.pdf

#### History

##### #1 - 01/07/2004 04:37 PM - Saurabh Garg

Access control feature is further described in bug# 88. The Geographic wizard page feature is described in bug [#1253](#).

All the rest of the changes have been done.
