

Metacat - Bug #1214

embl6 to eml2 conversion style sheets should be usable by both metacat and morpho

Description

The stylesheets as they are right now, have something that are specific to morpho and other things are specific to webmd module. So there should be a parameter defined based on which the stylesheet know how to transform the beta6 documents.

Also the stylesheets dont handle the contact and creator tags properly. This needs to be corrected based on whether the stylesheets would be used by metacat or morpho.

History

#1 - 08/11/2005 03:40 PM - Saurabh Garg

Was fixed earlier. Has been working fine for a long time now. Closing the bug.
