#### Description

I just tried entering some metadata for a file and found that morpho would not let me enter metadata for certain columns. It would skip over those columns and refuse to display information about them. I was able to later go back and edit the column information, but was not able to do so in the wizard.

The columns in question were Grapsid, Pagurid and Pinnotherid I believe. A piece of the file is below:

```
date_in date_out buoy replicate sample_id Cancrid Crabs Grapsid Majid
Non-cancrid crabs Pagurid Pinnotherid Porcellanid Urchins
1992-03-20 1992-04-02 alpha 1 4859 1 1 0 0 0 0 0 0 0
1992-03-20 1992-04-02 alpha 2 4860 1 1 0 0 0 0 0 0 0 1
1992-03-20 1992-04-02 alpha 3 4863 6 6 0 0 0 0 0 0 0 1
1992-03-20 1992-04-02 moms 1 4861 5 5 0 0 0 0 0 0 0 0
```

#### History

##### #1 - 01/05/2004 11:05 AM - Dan Higgins

There is a bug in Morpho 1.4 in the TextImportWizard routine that displays the average value of numeric columns when all the values are 0. [Code truncates the string display of the average, but when all values are 0, the string has fewer characters than expected.]

This code has been removed in the 1.5 version of Morpho. Thus problem has been fixed for EML2.
