Bugzilla-Id:	124		
Description <p>This RFE is for a mechanism for batch display of the documents in a resultset, so that the user can see a single, "integrated" view of all of the relevant metadata and page through it or print it. Generating a PDF file for this may be sufficient. How this is accomplished while maintaining the appropriate associations between metadata and data entities is not yet determined.</p> <p>This RFE originated from comments from schild@nceas.ucsb.edu.</p>
