Description

For some unknown reason, the part of the TextImport where a table file is parsed and column parameters are 'guessed' now takes 'much longer' to occur that it did with exactly the same data file in previous versions (<1.5) of Morpho.

This performance delay seems to get quite large as the number of columns increases.

History

#1 - 01/08/2004 11:47 AM - Dan Higgins

I am tentatively assigning this to Peru since he is the author(I think) of most of the new code. Dan Higgins
