Target version:	1.5	Spent time:	0.00 hour
Bugzilla-Id:	1260		
Description			
The Export function either fails to include the data file or throws an error. Need to check this (since it used to work!) (Dan Higgins)			

History

#1 - 01/22/2004 11:06 AM - Dan Higgins

There was no code in the export method to save the data file(s) as part of the export process! Added a routine to include a data directory and add copies of the data file to this part of the export. Also added checks on the 'location' variable to terminate the export if the package has not been saved (indicated when 'location' == "")
