

Morpho - Bug #127

change resultset display to be dataset oriented

09/20/2000 11:40 AM - Matt Jones

Description Need to make both the local and metacat resultset displays be "dataset oriented", in that they should display a list of datasets rather than actual hits on metadata documents. Each dataset is represented by a proxy metadata document, generally eml-resource, but this should be configurable. Related documents should be a hierarchical tree (collapsible) below the entry in the table.
