#### Description

Reported in morpho-feedback-20040122.doc in /doc/devs/ by Andrea Chadden

Adding keywords to the Datapackage: It is not clear how one enters > 1 new keyword using the latest Morpho editor. Previous version had a 'repeat field' key. Also, keyword entry is possible when 'eml' selected in the Choice dropdown box, but not when 'dataset' is selected. What is the distinction between these selections?
