Reassigned to bojilova. She will modify servlet to allow updates and deletes of metadata documents based on docid. If the action is "INSERT" and the docid provided is not unique, generate an error. IF the action is "INSERT" and the docid is null, assign a new docid from the server's central pool of accession #'s. If action is "UPDATE", docid is required. IF action is "DELETE", docid is required.

#2 - 06/26/2000 03:40 AM - Matt Jones

Created basic update and delete functionality. Substantial changes to all classes, but focused on DBWriter and MetaCatServlet. There is still an outstanding bug in MetaCatServlet that keeps it from running on a second call (NullPointerException). The bug relates to the Class cast on line 159 of DBWriter.java. I will return to this ASAP and get it fixed. The command tools work fine in the meantime.

#3 - 06/26/2000 03:43 AM - Matt Jones

Will complete testing and bugfixes for bug # 13 and bug # 24

#4 - 06/26/2000 10:05 PM - Matt Jones

Fixed errors with Update and Delete functions. Tested out fine under a variety of error conditions.
