Metacat - Bug #1324

A Commit or Save Work button that wrote intermediate results to the metadata

02/05/2004 07:38 PM - Saurabh Garg

Status:	New		**Start date:**	02/05/2004
Priority:	Normal		**Due date:**

Target version:			**Spent time:**	0.00 hour
Bugzilla-Id:	1324			

Description

From Ricks comments:
Entering metadata using the Data Repository screen can take 10 to 30 minutes or
longer; sometimes Internet connections can fail or browsers crash, which leads
to loss of data. It would be reassuring and productivity-enhancing if the
screen had a 'Commit' or 'Save Work' button that wrote intermediate results to
the metadata. I realize that this can be done by saving and then re-opening the
(existing) data package for further entry; but a 'one-button' solution would be
even better.

History

#1 - 03/27/2013 02:16 PM - Redmine Admin

Original Bugzilla ID was 1324

#2 - 04/10/2013 11:30 AM - ben leinfelder

- Assignee changed from Saurabh Garg to Chris Jones

- Target version changed from 2.x.y to 2.1.0

Can consider this for the Metacat-UI project specs

#3 - 07/09/2013 02:17 PM - ben leinfelder

- Target version deleted (2.1.0)
