Morpho - Bug #1337

better handling of 'references' in XML editor

02/09/2004 11:08 AM - Dan Higgins

Bugzilla-Id:	1337			

Description

The display and handling of eml2 'references' node in the XML editor is
confusing. Display should automatically look up 'references' (i.e. like a macro)
and show the referenced information. CHOICEs between data and 'references' would
then not be shown in the tree, simplifying display.

History

#1 - 02/19/2004 12:15 PM - Dan Higgins

unused 'references' nodes are now removed from the display. This does simplify
the visual display considerably.

#2 - 04/01/2004 03:09 PM - Dan Higgins

references are now shown in the subtree display on the right of the editor. Text
is added to indicate that a reference is being displayed and when a reference is
displayed, it cannot be edited. (i.e. user must edit tha actual node being
referenced.)
