Description

we need to add an interface to kepler to deal with querying the ecogrid for data and services. the interface that was discussed in january at nceas includes adding a tab to the actor library with ecogrid search criteria. when a search is complete, the results of the search can be dragged onto the canvas where they will access the grid on runtime. jing, could you please add your notes from that meeting to this bug?

History

#1 - 02/09/2004 03:52 PM - Jing Tao

In kepler/docs/dev, there are two files ecogridDatasetGUI.jpg and datatableActor.jpg. They are the pictures we draw for the inteface. Also we decided adopt search interface in Morpho for query. Moreover, the search interface should be reconfigurable for different namespace document. I will continue to work with the design document.

#2 - 01/20/2005 09:57 AM - Jing Tao

Currently in kepler we already added ecogrid interface to query data and service. The functionality basicly works. But the GUI need to be improved. See bug 1655
