<b>Description</b>			

#### History

##### #1 - 09/21/2004 03:58 AM - Matt Jones

The cancel button on delete still leads to blank, but also after successful delete the screen is blank. Retargeting this at 1.5.

##### #2 - 12/16/2004 04:55 AM - Saurabh Garg

Not able to reproduce the blank screen after successful delete. I get a Success message.

##### #3 - 12/20/2004 11:50 AM - Veronique Connolly

I tried it with two different data packages and I got a Success message.

##### #4 - 12/21/2004 01:31 PM - Saurabh Garg

Fixed. Not closing the bug right now as other changes in registry will also be made, so will close this after testing of registry.

##### #5 - 12/22/2004 11:56 AM - Saurabh Garg

Was able to reproduce the behaviour which Matt reported. This happens in cases where there is a special character in the document. This is true for both edit and delete functions.

For both edit and delete function, the document is retrieved from metacat and parsed using XML::Lib->XML. Thats where the error occurs - the script exits without doing anything and hence giving a blank screen. LibXML is not able to read special characters.

Solution is to normalize before editing and deleting.

##### #6 - 01/07/2005 03:56 PM - Saurabh Garg

Fixed by normalizing delete function.

##### #7 - 01/07/2005 03:57 PM - Saurabh Garg

And closed.
