Description

The Morpho editor tries to validate any document changes. This validation code apparently works OK as long as the path to the root does not include any directories with spaces in the directory name. However, on Windows, if the Morpho directory is installed inside 'Program Files', validation fails because the eml.xsd file cannot be located!

History

#1 - 03/08/2004 03:59 PM - Dan Higgins

Fixed the bug by using UML encoding with any spaces in directory names being replaced by '%20'

#2 - 03/27/2013 02:16 PM - Redmine Admin

Original Bugzilla ID was 1362
