

Metacat - Bug #1368

If a document's revision is 0, it couldn't be replicated

| Description If a document's revision is 0 in host A, it can't be replicated to host B. This is because we decided revision number should start at 1. But in knb-lter-gce, the documents start revision number from error. We should fix the bug. | | | |

History

#1 - 03/15/2004 02:23 PM - Jing Tao

In DocumentImpl class, the constrain for revision in replication was changed.
Revision = 0 is allowed now. So any revision number which is greater and equals 0 can be replicated.
