

Metacat - Bug #1372

Registry: Reconfigure entryForm.tpl

03/18/2004 11:29 AM - Saurabh Garg

Status:	Resolved	Start date:	03/18/2004
Priority:	Normal	Due date:	
Assignee:	Andrea Andrea	% Done:	0%
Category:	registry	Estimated time:	0.00 hour
Target version:	1.5	Spent time:	0.00 hour
Bugzilla-Id:	1372		
Description			
entryForm.tpl needs to be reconfigured because it has someplaces with skin names have to be hard coded into it. This should be changed and made achievable from cfg file.			

History

#1 - 09/21/2004 03:59 AM - Matt Jones

Andrea is working on a new layout for this whole page, and removing all of the hardcoded styles so that it fits into the 'skins' configuration better.

#2 - 12/15/2004 12:51 PM - Matt Jones

Andrea -- what is the status on this form redesign? Can it be incorporated into the registry now?

#3 - 01/07/2005 02:47 PM - Andrea Andrea

The changes to the entry form and associated style sheets were completed and checked into cvs.
