Description

The grammar needs to be corrected in Step 4 of 14 in the wizard (People and Organizations).

Here's what it should say:

Identify the people and organizations responsible for the data. In the next few screens <note: no comma> you will need to provide the following information:

Owner: The person or organization who is credited with creating the data. <cut the second sentence. it's redundant.>

Contact: The primary person or organization to contact with questions regarding the use or interpretation of the data package.

Associated partys <simplify the heading>: These are people or organizations that are in some way responsible for the data. They may have assisted in collection (originator) or maintenance of the data or they may have created or added documentation to the data (metadata provider).

History

Other issue with wording is that we use mixture of Metadata, Data package, Documentation and Data all over Morpho. This was confusing to me as a user. I think all instances of metadata can be replaced by documentation.

#2 - 03/31/2004 05:08 PM - Rick Reeves

Reeves suggests the following changes to text for this step:

<first line only>

Identify the people and organizations responsible for the data:

Please be prepared to provide the following 'people-related' information for one or more points of contact:

<existing bulleted list>
