<b>Bugzilla-Id:</b>	1388		

#### Description

The temporal coverage fields require dates of the following format:

YYYY-MM-DD

and specifically does not allow single digit month or day values. The error message returned when a single digit is used is completely unclear about the problem:

An error occurred. Most likely some required fields were missing. Please check the list of errors below and [click here](#) to return to the previous form to fill in all required fields and submit the form again.

- cvc-datatype-valid.1.2.1: '2004-1-1' is not a valid 'dateTime' value.

We should change the registry script to automatically test for single digit month and day values, and if found to add the leading 0 that is required before the submission occurs.

#### History

##### #1 - 04/30/2004 10:46 AM - Saurabh Garg

Fixed.

Replaced text field with drop down menu which lists all months and days

##### #2 - 03/27/2013 02:17 PM - Redmine Admin

Original Bugzilla ID was 1388
