Target version:	1.5	Spent time:	0.00 hour
Bugzilla-Id:	1389		

Description

The "Note" at the bottom of screen 1 needs to be rewritten. It should say: Required information includes the title and personell information for your dataset. The rest of the information collected here is optional, however it is highly recommended that you fill in as much as possible.

History

#1 - 03/29/2004 10:59 AM - Chad Berkley

In the data package wizard page 1 of 14, the last sentence (in the top block of text) should read "You can provide **the** following types of information using this wizard. Also note that the word metadata is used throughout this text. It should probably be changed to "documentation" or whatever the current choice of synonym is. The first sentence on this page references the EML guide and says the user should read it but doesn't say where it is or where you can get it. Perhaps we could add a link to it that would open a browser?"

#2 - 03/31/2004 04:50 PM - Rick Reeves

Suggest the following modification for the opening paragraph:

The Data Package Wizard guides Morpho users through the NEW data package generation process. A Data Package is the entity used to store and document ecological datasets that you wish to publicize within the scientific community. Data Packages have two components: A mandatory dataset description, known as metadata; and, optionally, the actual dataset described by the metadata. Morpho uses Ecological Metadata Language (EML) to construct data packages.

Morpho users need not be fluent in EML to enter new data packages with the Data Paclmage Wizard; however, some EML knowledge is required to modify EXISTING data packages. Please consult the EML Guide and EML Handbook for detailed EML descriptions and examples.

Before proceeding to the next step, please assemble these descriptive elements for your dataset: <bulleted list, two items per line>

#3 - 04/05/2004 04:07 PM - Chad Berkley

incorporated changes as noted.
