

Morpho - Bug #1393

metacat perference will reset to default value when you restart morpho

03/24/2004 05:08 PM - Jing Tao

Bugzilla-Id:	1393		
Description			
<p>After you set metacat preference in morpho and click set button, morpho will communicate the selected metacat. But if you close morpho and restart it again, the metacat preference will go back to the default value - production metacat. That confused me when I did the testing. I think it is a bug. I used cvs morpho code and update in about 2:00 pm March 24.</p>			

History

#1 - 03/25/2004 11:06 AM - Dan Higgins

Problem created by mismatch of new version number which was made in Morpho.java and build.xml files, but not in the lib/config.xml file. When these all match, now config file is automatically installed and will save changes in preference info.
