Target version:	1.5	Spent time:	0.00 hour
Bugzilla-Id:	1418		

**Description**

I created a package with the wizard then attempted to save the package (both locally and to the server) and I got an error: MetacatUpload Exception in EML200DataPackage!

```
<error>
cvc-complex-type.2.4.a: Invalid content starting with element 'methods'. One
of '{"":access, "":dataTable, "":spatialRaster, "":spatialVector, "":storedProcedu
re, "":view, "":otherEntity}' is expected.
</error>
```

when i click ok, it displays the same error again, then i click ok it appears to save the package locally, but not to metacat.

Here's the console log:

removed from window list  
MetacatUpload Exeption in EML200DataPackage!

```
<?xml version="1.0"?>
<error>
cvc-complex-type.2.4.a: Invalid content starting with element 'methods'. One of
'{"":access, "":dataTable, "":spatialRaster, "":spatialVector, "":storedProcedur
e, "":view, "":otherEntity}' is expected.
</error>
```

Problem Saving

```
<?xml version="1.0"?>
<error>
cvc-complex-type.2.4.a: Invalid content starting with element 'methods'. One of
'{"":access, "":dataTable, "":spatialRaster, "":spatialVector, "":storedProcedur
e, "":view, "":otherEntity}' is expected.
</error>
```

History

#1 - 03/30/2004 10:23 AM - Chad Berkley

It looks like the problem is that the methods element is being inserted out of order in the document. The EML document morpho created had the following order: contact, project, methods, access. The order in the schema is: contact, methods, project, access.

#2 - 03/30/2004 10:44 AM - Saurabh Garg

Fixed. Eralier, Method and Project screens were not being inserted in right order.

#3 - 03/27/2013 02:17 PM - Redmine Admin

Original Bugzilla ID was 1418
